

Ahoy Mateys!

Your Captain needs your help! He's lost the treasure map that shows where he and the crew hid all the treasures they have captured. All they have is this wacky GPS contraption they stole from a ship, but they don't know how to use it. Can you and your Pirate team use the high-tech GPS to find the hidden stashes?

There are a total of 6. Your captain wants to make sure you are trustworthy, so make sure to follow the directions on each treasure exactly! Bring back the items he wants. He promises to reward you if you return with the right items!

Rules:

1. You must stay together. Always.
2. Work as a team. Everyone should help find the treasures and solve the problems.
3. Take turns using the GPS. The navigator will set the GPS, and hand it off to the next person.
4. Take your time solving the problem. Sit down and use your scrap paper if necessary.

Jobs:

- **Navigator**—Set the GPS to find the next treasure.
- **Reader**—Read the problem on the lid of the stash.
- **Loot Holder**—Hold the loot your team has found at each stash. Check off the stashes you've visited.
- **Hider**—Re-hide the stash just like your team found it.

Tips:

- Keep moving. The arrow will not point correctly unless you are moving.
- Hold the GPS straight up.
- When you get within 20 feet of the treasure, stop using the GPS and start using your eyes.
